## STAINLESS STEEL PIPES

# BATISAN

Our company has started its activities in 2014 in Izmir / Turkey. Our main goal is to our customers with the most reasonable prices by importing and supplying hygienic and industrial stainless steel pipe fittings, valves and tank manufacturing equipments.

Our company contributes to the industry by improving its product range day by day and takes its place among the developing companies of the sector. The products we import are in compliance with world standards and quality certificates are supplied with the products. Our business partners from abroad are carefully determined and our works with the manufacturers with the highest product quality have been continuing for years.

Thanks to our young and dynamic team, we respond to the demands of our customers in a short time, and maintain our service at the highest level in terms of sales, technical support and after-sales service.

Our company conducts continuous researches on identifying, researching and creating alternative products needed in the sector and provides solutions to its customers.
